1. **Public Satisfaction Analysis toward District-Level Public Services in Semarang City**

💼 The Situation

Creating a Data-Driven Public Service Evaluation with BRIDA Semarang

Every year, the Government of Semarang strives to improve public service quality across districts and sub-districts. However, without a structured and reliable measurement system, understanding how citizens truly perceive these services remained a challenge.

BRIDA Semarang required more than a standard satisfaction survey — they needed a **comprehensive, data-driven evaluation framework** that could measure performance, identify gaps, and guide policy decisions across 16 districts and 177 sub-districts.

Type

Survey, Data Analysis, Policy Insight

⚠️ The Challenges

Evaluating Public Service Performance at Scale

1

Wide Coverage & Diverse Population
Capturing citizen feedback across 16 districts and 177 sub-districts required a structured sampling method to ensure representativeness across demographics and service experiences.

2

Multi-Dimensional Service Evaluation
Public service quality needed to be measured across multiple dimensions, including reliability, responsiveness, assurance, empathy, and tangible aspects — all with different expectations.

3

From Data to Policy Action
Transforming large-scale survey data into **clear, actionable recommendations** for government stakeholders was critical to ensure real impact.

🧠 Our Approach

A Structured, Data-Driven Evaluation Framework

Instead of applying a generic survey, we designed a **comprehensive evaluation system** combining quantitative and qualitative approaches to generate meaningful insights.

---

01 — Stakeholder Alignment

We collaborated with BRIDA to define research objectives aligned with **public service performance indicators and policy priorities**.

---

02 — Field Survey Deployment

- Survey conducted across **16 districts & 177 sub-districts**
- Respondents: citizens who had accessed public services
- Method: structured questionnaires (IKM standard) + field validation

---

03 — Data Analysis & Measurement

We applied:

- **Indeks Kepuasan Masyarakat (IKM)** framework
- **SERVQUAL analysis** (gap between expectation & perception)
- Performance evaluation aligned with local government standards

---

04 — Insight & Reporting

We translated complex data into:

- Clear performance scores
- Gap analysis
- Strategic recommendations for policy improvement

🔍 What We Found

Key Insights from Public Service Evaluation

Strengths

Areas that consistently delivered high satisfaction:

- High overall satisfaction with public services (**IKM: 88.64 – Very Good**)
- Positive perception of government staff professionalism
- Strong foundation of public trust toward service institutions

---

Weaknesses

Critical gaps identified:

- Service quality not yet fully consistent across regions
- Gap between citizen expectations and actual service outcomes
- Responsiveness and service experience still need improvement

---

Opportunities

High-impact areas for improvement:

- Standardization of service quality across districts
- Strengthening citizen-centered service design
- Data-driven policy monitoring and evaluation systems

Threats

Risks that may affect long-term performance:

- Variability of service quality between districts
- Increasing public expectations toward government services
- Limited capacity to sustain continuous improvement without structured evaluation

---

📊 The Results

Measurable Impact on Public Service Evaluation

88.64
Indeks Kepuasan Masyarakat (Kategori A – Sangat Baik)

16
Districts evaluated

177
Sub-districts analyzed

💬 Key Insight

> “Public service performance is already strong — but consistency and quality standardization are the key to sustaining public trust.”

🚀 Impact

For the first time, Semarang now has:

- A **comprehensive baseline of public service performance**
- A **data-driven understanding of citizen satisfaction**
- Clear direction for **policy improvement and service standardization**

📦 Deliverables

- Public Satisfaction Index (IKM) Report
- Performance Evaluation of District & Sub-district Services
- Gap Analysis (SERVQUAL-based)
- Strategic Policy Recommendations

2. Comparative Advantage Analysis of Indonesia's Clove (Syzygium aromaticum) Export in International Market

---

💼 The Situation

Unlocking Indonesia's Export Potential Through Clove Competitiveness Analysis

Indonesia is the world's largest clove producer, yet it does not hold the top position in global exports. Despite strong production capacity, export performance remains inconsistent due to fluctuating productivity, domestic demand dominance, and global competition.

This study was conducted to provide a **data-driven understanding of Indonesia's competitive position** in the global clove market, and to identify whether Indonesian cloves hold a sustainable comparative advantage.

Client / Research Context

Academic & Policy Research

Team

Ayunina Zenti, S.P., M.Sc.
Jendral Soedirman Research Team

Type

Economic Analysis, Export Competitiveness Study

⚠️ The Challenges

Understanding Global Trade Competitiveness

1

Mismatch Between Production & Export Leadership
Indonesia leads in clove production but ranks second in exports, indicating inefficiencies in export competitiveness.

2

Fluctuating Productivity
Despite increasing plantation area, productivity remains unstable due to climate factors and limited technological adoption.

3

Global Market Competition
Strong competition from countries like Madagascar, Singapore, and Comoros requires deeper analysis of comparative advantage.

🧠 Our Approach

A Quantitative, Trade-Focused Analysis Framework

This study applied a **quantitative-descriptive approach** using secondary data from international and national institutions.

---

01 — Data Collection

- Time series data (2010–2019)
- Sources: BPS, FAO, UN Comtrade, Ministry of Agriculture
- Commodity: Clove (HS Code 0907)

---

02 — Analytical Framework

We used two core indicators:

- **Revealed Comparative Advantage (RCA)**
  → Measures export competitiveness relative to global trade
- **Revealed Symmetric Comparative Advantage (RSCA)**
  → Refines RCA into a balanced competitiveness index

---

03 — Benchmarking Analysis

Comparison with major exporting countries:

- Madagascar
- Singapore
- Comoros

🔍 What We Found

Key Insights from Export Competitiveness Analysis

Strengths

- Indonesia has a **strong comparative advantage** in clove exports
- Average **RCA: 12.88 (>1 = highly competitive)**
- Average **RSCA: 0.76 (positive = strong market position)**
- Largest clove production globally

Weaknesses

- Export volume is limited due to **high domestic consumption (cigarette industry)**
- Productivity fluctuates despite increasing land area
- Limited adoption of modern agricultural technology

Opportunities

- Optimization of large plantation area
- Increased export potential through productivity improvement
- Strengthening position in global market through specialization

---

Threats

- Strong dominance of Madagascar in global exports
- Competition from re-export countries like Singapore
- Climate dependency affecting production stability

📊 The Results

Measurable Insights on Export Competitiveness

12.88
Average RCA Value (Strong Comparative Advantage)

0.76
Average RSCA Value (Positive Competitiveness Index)

2010–2019
Time Series Analysis Period

💬 Key Insight

> “Indonesia has the resources to lead the global clove market — but without productivity optimization and export focus, potential remains underutilized.”

🚀 Impact

This study provides:

- A **clear validation of Indonesia's comparative advantage**
- Strategic direction for improving export competitiveness
- Insight for policymakers to balance **domestic demand vs export growth**

📦 Deliverables

- RCA & RSCA competitiveness analysis
- Global benchmarking report
- Export performance insights
- Strategic recommendations for productivity & trade improvement

3. Business Plan

💼 The Situation

Building a Modern Printing Business Through System & Market Integration

Sinau Print hadir sebagai solusi atas kebutuhan industri percetakan lokal yang semakin dinamis di Semarang. Meskipun permintaan cetak terus meningkat, banyak pelaku usaha percetakan masih terjebak pada sistem konvensional yang tidak efisien, tidak terstandarisasi, dan sulit berkembang.

Dengan positioning **"Solusi Cetak Tanpa Batas"**, Sinau Print dibangun bukan hanya sebagai jasa percetakan, tetapi sebagai **system-driven printing business** yang mengintegrasikan layanan cetak, branding, dan digitalisasi operasional.

Client / Business Context

Printing & Advertising Industry

Brand
Sinau Print

Team
Artic Analytica Team

Type
Business Development, & Marketing Research

⚠️ The Challenges

Transforming Conventional Printing into a Scalable Business

1

Lack of Standardization & Transparency
Harga dan produk tidak terstruktur menyebabkan kebingungan pelanggan dan inefisiensi tim.

2

Unstructured Operational System
Proses kerja manual, tidak terdokumentasi, dan sangat bergantung pada individu.

3

High Price Competition
Banyak kompetitor bermain di harga murah tanpa standar kualitas yang jelas.

4

Limited Digital Integration
Belum adanya sistem online, marketplace, dan automation dalam operasional.

🧠 Our Approach

Building a System-Driven Printing Business

Pendekatan yang digunakan adalah mengubah Sinau Print dari sekadar percetakan menjadi **integrated business system**.

---

01 — Brand & Positioning Development

- Positioning: *Solusi Cetak Tanpa Batas*
- Campaign: **#TemanCetakMuKapanAja**
- Filosofi: Adaptif, fleksibel, dan solutif terhadap kebutuhan pelanggan

---

02 — Operational System Design

Implementasi sistem digital untuk meningkatkan efisiensi:

- POS (Point of Sales)
- Warehouse Management System (WMS)
- Sistem Antrian Digital
- SOP Operasional (end-to-end workflow)

---

03 — Product & Service Structuring

Menyusun produk berbasis kebutuhan pasar:

- Print Outdoor (MMT, banner)
- Print Indoor (stiker, vinyl)
- DTF printing (custom apparel)
- Produk kantor & event (A3, brosur, ID card)

---

04 — Hybrid Marketing Strategy

Menggabungkan offline & digital:

Offline

- Door-to-door UMKM
- Sales activation
- Event & booth

Digital

- Instagram & TikTok activation
- WhatsApp-based conversion
- Marketplace development

---

05 — Business Model Strategy

Dua engine utama:

- **Retail → cashflow cepat**
- **Korporat → omzet besar & stabil**

🔍 What We Found

Key Insights from Business Development Analysis

Strengths

- Mesin cetak modern & berkualitas tinggi
- Produk beragam (retail hingga korporat)
- Harga kompetitif
- Fleksibilitas layanan tinggi

Weaknesses

- Lokasi kurang strategis
- Brand awareness awal masih rendah
- Belum fully digital di awal operasional

Opportunities

- Pertumbuhan UMKM lokal di Semarang
- Tren custom merchandise (DTF, branding)
- Tingginya kebutuhan event & komunitas

Threats

- Kompetitor berbasis harga murah
- Marketplace printing nasional
- Fluktuasi biaya bahan baku

📊 The Results

Projected Business Performance & Impact

💰 Financial Projection

Rp150 juta
Target omzet awal per bulan

Rp2,1 miliar
Proyeksi omzet tahun pertama

⚙️ Operational Impact

- Proses lebih cepat & terstandarisasi
- Error produksi menurun
- Workflow lebih terukur & scalable

📈 Market Impact

- Target 100+ pelanggan retail (3 bulan awal)
- Penetrasi ke segmen:
    - UMKM
    - Instansi
    - Komunitas
    - Event & kampus

💬 Key Insight

> “Printing business is no longer about machines — it’s about systems, speed, and service experience.”

🚀 Impact

Sinau Print berhasil membangun fondasi sebagai:

- **System-driven printing business**
- **One-stop printing & branding solution**
- **Scalable business model berbasis digital & operasional terstruktur**

📦 Deliverables

- Business Model & Growth Strategy
- Operational System (POS, WMS, SOP)
- Marketing Strategy (Offline & Digital)
- Product Structuring & Pricing System
- Business Roadmap & Expansion Pla\\n
